LUX ELEMENTS – WETROOM PRODUCTS

Quality made in Germany
Wetroom products from LUX ELEMENTS proven worldwide

- Decades of experience
- High level of technical expertise
- International team
- Professional advice and support
- Modern flexible production methods
- Tried and tested building materials
- Quality control from the start
- Certified quality management

LUX ELEMENTS® –
THE ORIGINAL

- Environment-friendly
- Modern building material
- Proven material advantages
- Excellent for use in wet and humid conditions
- Very good machinability
- Continuous development
- Modern, system-oriented product range

1. Polystyrene hard foam
2. Contact mortar layer
3. Glass fibre fabric
4. Coating mortar layer

The Original can do!

- Environmentally friendly
- Proven quality
- Pressure-stable and rigid
- Lightweight
- Water-resistant
- Fire-retarding
- Insulating
- Mould-resistant
- Design variety
- Alternative surfaces
- Economical
- System-oriented
LUX ELEMENTS – WETROOM PRODUCTS

The wetroom solution system
All components from a single source

The wetroom is exposed to many stresses such as water, steam and heat. The water-resistant and mould-resistant hard foam support elements from LUX ELEMENTS are the appropriate material for the substrate here.

- Wall and floor panels
- Bath surrounds
- Shower bases and drain system
- Benches
- Niches
- Curbs and Ramps
- Washstands
- Accessories
Invest in a secure wetroom solution –

invest in LUX ELEMENTS® wetroom solution system!

LUX ELEMENTS has developed high quality waterproof flooring and walling systems to deal with the demands of both old and modern buildings. Whether the substrate is solid or wooden LUX ELEMENTS will ensure peace of mind and a longer life for the tiles.

■ Complete system
■ High-quality products from Germany
■ Certified sealing system
■ Perfectly matched components
■ Full cost control due to system quotation
■ Fast, trouble-free realisation
■ Safe investment, long-term use

ASME A112.18.2 / CSA B 125.2
cUPC certified as a part of a kit listed under the IAPMO file 8712.
LUX ELEMENTS – WETROOM PRODUCTS

Double Security
with second drainage level

Tiles and grout are not watertight! LUX ELEMENTS is one of the few companies who provide a solution when water passes through the grout and tiles and on to the waterproof layer.

- Evacuates the water even when it gets under the tiles
- Ensures tiles stay firmly fixed to the tray
- Adhesives are not affected sitting in water
- Keeps the grout in better condition
- Furthers the life of the wetroom floor
Wall and floor panels
The universal construction panel

LUX ELEMENTS®-ELEMENT-EL is a support element made of polystyrene hard foam with mortar coating and glass fibre fabric on both sides. The panel is a more suitable material for wetroom construction than plasterboard and wood.

- Reliable on the wall
- Creative in design
- Strong on the floor
- Ready for tiling
- Easy-to-use
- Versatile in everyday practice
Wall and floor panels

Specifications
LUX ELEMENTS®-ELEMENT-EL ...

The construction panels from the ELEMENT product group are available in many thicknesses and designs for different areas of application. They are suitable for use on the wall, as well as on the floor.

For further information, please refer to our documents. Data sheets, test certificates and processing instructions can be downloaded from www.luxelements.ca

LUX ELEMENTS®-ELEMENT-EL 1524/900 12

The universal construction panel especially for the Canadian market dimensions:
1524 x 900 x 12 mm · 5’ x 3’ x 1/2”

Wall cladding on stud frames

Floor protection

Floor leveling with shower base flush with the floor
Bath tub surrounds

Ready for tiling

LUX ELEMENTS®-TOP-TR... are prefabricated bath tub surrounds for rectangular standard bath tubs.

Available are three different design variants for bath tub surrounds:

■ Surrounds for smooth and flush bath cladding
■ Surrounds with footboard
■ Surrounds with ledge
Bath tub surrounds

Specifications

Surrounds with LUX ELEMENTS®-TOP-TR...

Bath tub surrounds for rectangular standard bath tubs. Available are three different design variants:

- **LUX ELEMENTS®-TOP-TRS**
  - Surrounds for smooth and flush bath cladding for bath tubs up to 2100 mm - 82 11/16" and bath tub head end

- **LUX ELEMENTS®-TOP-TRU**
  - Surrounds with footboard for bath tubs up to 2100 mm - 82 11/16" and bath tub head end

- **LUX ELEMENTS®-TOP-TRV**
  - Surrounds with ledge for bath tubs up to 2100 mm - 82 11/16" and bath tub head end

Please note:
Bath tub surrounds for standard rectangular tubs are not available as kits. Depending on the installation situation as many as 4 elements are needed.
For the three design variants the following installation positions are possible:

- Free-standing
- Niche installation
- Corner installation
- 3-sided installation
- Installation with shelf

Inspection options and mounting aids for TOP-TR...

Two solutions are available to choose from for maintenance and repair. LUX ELEMENTS offers complete mounting kit and mounting aid for bath tub surrounds.

For further information, please refer to our documents. Data sheets, test certificates and processing instructions can be downloaded from www.luxelements.ca
Shower bases

and drain system

The centrepiece of the shower area is the shower base. Whether in a corner or as a replacement for a bath tub, whether as a step up on the floor or a flush with the floor solution, LUX ELEMENTS offers a suitable model for every application in two drainage versions, point and linear.
Shower bases and drain system

- Models for every installation situation
- For concrete and wooden substrates
- With point drainage or floor channel drain
- Large range of matching accessories
- Made-to-measure designs are also possible
Shower bases and drain system

  external dimensions: 406 x 89 x 1070 mm
  internal dimensions: 305 x 77 x 968 mm

niches prefabricated from ELEMENT-EL 12
Curbs and Ramps

Curbs – as water stop

Optional curbs between the shower and the floor are a suitable method of protecting the bathroom against splash-water from the shower.

LUX ELEMENTS has two standard curbs in different lengths for this purpose. The curbs can be adapted to fit any shower base dimensions by simply cutting to size.

Ramps – for creating a barrier-free shower area

Prefabricated ramps allow to create a barrier-free transition from bathroom floor to a shower base with a step (Step-Up).

LUX ELEMENTS has two standard ramps in two widths with different gradients. The ramps can be adapted to fit any shower base dimensions by simply cutting to size.
Curbs and Ramps

Specifications

Please consult with technical support regarding installation instructions of ADA Accessibility Guidelines (ADAAG)
**LUX ELEMENTS – WETROOM PRODUCTS**

### Curbs

Many configurations can be achieved with LUX ELEMENTS®-RELAX-CU-F curbs. Below are some examples:

![Curbs](image)

- **LUX ELEMENTS®-RELAX-CU-F 5**
  - Dimensions: 1524 x 114 x 130/127 mm
  - 60" x 4 1/2" x 5 1/8" / 5"

- **LUX ELEMENTS®-RELAX-CU-F 8**
  - Dimensions: 2444 x 114 x 130/127 mm
  - 96" x 4 1/2" x 5 1/8" / 5"

**For further information, please refer to our documents. Data sheets, test certificates and processing instructions can be downloaded from [www.luxelements.ca](http://www.luxelements.ca)**

### Ramps

Many configurations can be achieved with LUX ELEMENTS®-RELAX-RP ramps. Below are some examples:

- **LUX ELEMENTS®-RELAX-RP M**
  - Gradient 19,2 %, dimensions: 1828 x 204 x 45 mm
  - 71 15/16" x 8 1/16" x 1 3/4"

- **LUX ELEMENTS®-RELAX-RP L**
  - Gradient 12,8 %, dimensions: 1828 x 304 x 45 mm
  - 71 15/16" x 11 15/16" x 1 3/4"
LUX ELEMENTS – WETROOM PRODUCTS

Washstands
in “floating design”

LAVADO-FLOAT are washstand models made of hard foam support material for individual tiling. An invisible suspension provides the four model variants with or without recess with a “floating design”.

The washstands can be shortened at the sides, which enables them to be adapted to smaller bathrooms. The construction of a row of washstands is also possible by means of arranging and gluing together several washstands.
- Individual design – Surface design freely selectable
- Easy to process – Prefabricated, ready for tiling
- Modern bathroom design with a “floating” look
- For every room situation – simple to shorten
- Double washstands and row constructions are easy to implement
- Ideally for barrier-free bathrooms
Washstands

Specifications

■ LUX ELEMENTS®-LAVADO-FLOAT – the principle

Hard foam support element
with fabric coating

Basin recess
with built-in slope

Assembly openings
For the simple assembly of drain and taps

The installation of LAVADO-FLOAT is possible not only on masonry but also on stud frames
LUX ELEMENTS – WETROOM PRODUCTS

■ LAVADO-FLOAT – model variants

Washstands with invisible suspension as set for single washing facility, incl. 1 piece COL-MK and 2 stainless steel brackets 450 mm · 17 11/16" in length.

LUX ELEMENTS®-LAVADO-FLOAT G
washstand, even, without recess
dimensions: 1170 x 585 x 100 mm
46 1/16" x 23 1/16" x 3 15/16"

LUX ELEMENTS®-LAVADO-FLOAT E
washstand with elliptical recess
dimensions: 1170 x 585 x 100 mm
46 1/16" x 23 1/16" x 3 15/16"

LUX ELEMENTS®-LAVADO-FLOAT R
washstand with rectangular recess
dimensions: 1170 x 585 x 100 mm
46 1/16" x 23 1/16" x 3 15/16"

LUX ELEMENTS®-LAVADO-FLOAT Z
washstand with cylindrical recess
dimensions: 1170 x 585 x 100 mm
46 1/16" x 23 1/16" x 3 15/16"

For further information, please refer to our documents. Data sheets, test certificates and processing instructions can be downloaded from www.luxelements.ca
LUX ELEMENTS® hard foam support elements are the ideal substrate for tiles, because they offer optimum hold for cement-based adhesives and seals. Even more advantages of the hard foam support elements in systems with ceramics:

- Emission-neutral, i.e. no vapours that are detrimental to health
- No subsequent affect on ambient air
- Without solvents and neutral in smell
- Resistant to mould
- For mosaic tiles up to large-sized ceramics
Individual Surface Design

Alternative surfaces: plasters

LUX ELEMENTS® hard foam support elements are also the right substrate for plasters, as the mortar coating offers reliable adhesion.

- Tested in systems by renowned plaster manufacturers
- Additional room for design is created even in combination with tiles
- Application is possible e.g. where tiles or mosaic cannot be installed due to curves.

Whether on the wall, for constructions, in the shower area or on the floor – hard foam support elements from LUX ELEMENTS are the right substrate anywhere. Not only for large-sized ceramics and mosaic tiles, but also for plasters.
