**Ideas and design tips**

# EXCLUSIVE WASHSTAND DESIGN

Secure. Fast. Individual.

The trend towards beneficial relaxation in your own four walls places high demands on the design of a bathroom. Right at the top of the list of wants: exclusive equipment to suit your own personal taste.

Modern bathroom planning is also about: **Think about tomorrow today!**

The new intergenerational bathroom should not only be chic, but also free from barriers and functional. Those who want to partly or fully renovate their bathroom are also faced with this challenge. It's not always easy to find suitable products. We'll help you!

This brochure provides suggestions and tips for the design of an individual washing area and shows how these ideas can be put into practice with LUX ELEMENTS.

Be inspired!

# Individual washing areas

## Flexible planning with **LUX ELEMENTS**

Demands are varied when it comes to planning a new washing area. As a central place in the bathroom, it is the showpiece of an appealing design. At the same time, accessibility plays an important role. A modern floating washstand fulfils both wishes.

Those who attach importance to individual design chose a product made of hard foam support material. Not only is the shaping flexible here, but also the surface design with tiles or plaster. This makes every washstand a unique gem!

With LUX ELEMENTS you benefit from these advantages:

### ■ **Washstands in a floating design**

Stable, invisible suspension by stainless steel brackets  
As a single or double washstand

### ■ **Individual design**

Custom shapes and sizes are also possible  
Free surface design with tiles or plaster

### ■ **For all types of wall**

Installation possible on masonry and stud frames  
Flexible installation height

### ■ **Ideally for barrier-free bathrooms**

Space underneath for wheelchairs or walking aids

## Unlimited possibilities with hard foam support material

Hard foam support material from LUX ELEMENTS has all the properties needed in a damp room. The building material, which is manufactured in an environmentally friendly process, is waterproof, mould-resistant and heat insulating. As the ideal substrate for alternative surfaces such as tiles and plaster, it enables individual design ideas to be put into practice.

A further advantage is the **flexible production in our own factory**. Custom-made products are possible even in small quantities.

Would you like to know more about the material?

## Washstands in a floating design

# LAVADO-FLOAT – the principle

Washstand models from LUX ELEMENTS made of hard foam support material for an individual surface design. An invisible suspension by means of sturdy stainless steel brackets means that the model variants have a "floating design".

### ■ Invisible suspension

- 1** Washstand panel – hard foam support material  
Details design and format variants: page 10 and 11
- 2** Drilled holes – for the use of the stainless steel brackets, positioning and number depend on the model
- 3** Stainless steel brackets – with sturdy mounting plate, number depends on the model

# EXCLUSIVE WASHSTAND DESIGN

Secure. Fast. Individual.

example model even, without recess

Installation is possible on both masonry and stud frames – quickly, easily and securely. The washstands can be shortened at the sides, enabling them to be adapted to the room situation.

## ■ Flexible width

If necessary, and depending on the model, the washstand can be shortened at the sides with a jigsaw and a suitable sawblade. The position of the stainless steel brackets must be considered when doing this.

For further information,  
please see [www.luxelements.com](http://www.luxelements.com)

# Washstands in a floating design

The **LAVADO-FLOAT** washstand range from LUX ELEMENTS offers the right product for every requirement and every room size. It includes standard models for single or double washstands, configurable variants and custom-made products according to customer requirements. A matching light rope is also available.

The final surface design with tiles or plaster leaves room for personal taste. With the choice of material, colour, structure and pattern, each washstand becomes an individual one-of-a-kind.

# EXCLUSIVE WASHSTAND DESIGN

Secure. Fast. Individual.

- Flexible width, depending on the model  
can be shortened at the sides
- Standard models with even surface  
suitable for fitted or top-mounted basins
- Standard models with channel drain and recess  
with reversible cover rail
- Light rope for indirect lighting  
as an optional technical component
- Made to measure  
e.g. row constructions or individual shapes

## Washstands in a floating design

# LAVADO-FLOAT – the design

### ■ Washstands without recess

Smooth washstands without a recess look particularly elegant due to their simplicity. They can be combined with either top-mounted or fitted basins and are suitable for commercially available fittings. Three versions are included in the standard LUX ELEMENTS range.

# EXCLUSIVE WASHSTAND DESIGN

Secure. Fast. Individual.

## ■ Washstands with recess

A washstand with a recess and channel drain is an extravagant eye-catcher.

LUX ELEMENTS offers three variants of this version. The cover rail is reversible in all standard models, thus offering two design variants: one side is tileable, while the other has an elegant stainless steel surface.

cover rail brushed stainless steel

cover rail turned, tiled

## Washstands in a floating design

# LAVADO-FLOAT – the models

LUX ELEMENTS® LAVADO-FLOAT G (point drainage) und LAVADO-FLOAT L (linear drainage), barrier-free and for installation on masonry as well as on stud frames.

### ■ Point drainage

Washstand even  
without recess

### **LAVADO-FLOAT G**

- Suitable for fitted or top-mounted basins (see p.10)
- Set for **single** washing facility
- Available in 1170 x 585 x 100 mm
- Stable suspension on **two** stainless steel brackets

### **LAVADO-FLOAT ONE G**

- Set for **single** washing facility, configurable
- max. width 1500 mm, max. depth 585 mm
- Height 100 mm
- Stable suspension on **two** stainless steel brackets

### **LAVADO-FLOAT TWO G**

- Set for **double** washing facility, configurable
- max. width 2400 mm, max. depth 585 mm,
- Height 100 mm
- Stable suspension on **three** stainless steel brackets

All models are supplied including 1 cartridge  
of COL-MK mounting adhesive

## ■ Linear drainage

### Washstand with channel drain with sloping recess

#### **LAVADO-FLOAT L**

- Channel drain: two design options due to a reversible channel cover rail (see p. 11)
- Set for **single** washing facility
- Available in 1170 x 585 x 100 mm
- Stable suspension on **two** stainless steel brackets

#### **LAVADO-FLOAT ONE L**

- Set for **single** washing facility, configurable
- max. width 1500 mm, max. depth 585 mm
- Height 100 mm
- Stable suspension on **two** stainless steel brackets

#### **LAVADO-FLOAT TWO L**

- Set for **double** washing facility, configurable
- max. width 2400 mm, max. depth 585 mm,
- Height 100 mm
- Stable suspension on **three** stainless steel brackets

Optional for all models: light rope, for the indirect lighting of the long side underneath the washstand, see p. 14

# Washstands – optional technology

## Indirect lighting – discreet und practical

A matching light rope including power supply unit is optionally available for all LAVADO-FLOAT washstand models. This is installed on the underside, thus creating **pleasant, soft room lighting**. If there are drawers or cabinets under the washstand, the light provides a better view.

In bathrooms without daylight or for nighttime use, it is recommended to **combine lighting technology with a motion detector**.

The **necessary milled slots** for the light rope **can be made in the factory** and positioned according to the customer's wishes.

# EXCLUSIVE WASHSTAND DESIGN

Secure. Fast. Individual.

## Plastic reinforcements – stable and robust

Washstands made of hard foam support material are particularly light. Nevertheless, a combination with additional components on the side or under the product is no problem at all. For example, if a towel rail or an under-sink shelf is to be attached, the mounting surface on the washstand is stabilised with a plastic reinforcement in the factory. This can also reliably withstand high loads.

For further information, please  
see [www.luxelements.com](http://www.luxelements.com)

# Flexible manufacturing with **LAVADO-FLOAT PLUS**

You can not find  
the right product?  
We also manufacture  
made to measure!

# EXCLUSIVE WASHSTAND DESIGN

## Secure. Fast. Individual.

Would you like a non-standard washstand? No problem!  
Whether extra storage space, an adapted recess cut-out or an alternative drain variant: LUX ELEMENTS manufactures your desired washstand as a custom-made product, including any necessary adaptations for under-sink cabinets or drawers.

### ■ Individual shapes and equipment

Washstands in a floating look are available in countless variants. The standard range shows only a small selection. In addition, LUX ELEMENTS produces alternative shapes and sizes. Round or rectangular, compact or delicate, one of a kind or a series.

The drainage technology is also flexible: Unlike the channel of the standard model, a channel drain with an extended cover rail is available. This covers the entire width of the washstand.

The LAVADO-FLOAT system enables:

- Combination of pre-designed components and technical articles
- Individual planning
- Combination of individual planning and standard articles

Give your washstand ideas free reign!

LUX ELEMENTS is also at your disposal digitally!

Alongside a comprehensive website, our calculators and social media platforms are at your disposal 24/7. All channels offer the possibility of direct contact.

# More from LUX ELEMENTS

**Individual shower areas with extras**

# EXCLUSIVE WASHSTAND DESIGN

## Secure. Fast. Individual.
