For shower, bathroom and wellness:

Leverkusen, 10.01.2023

Lux Elements expands range of bench seats

New tileable bench seats for shower, bathroom and wellness area have been available from Lux Elements since the beginning of 2023.These are divided into bench forms with fixed standard widths and models that can be shortened if necessary.

The three new bench forms "Solo", "Shape" and "Size" from the product group "Relax-Ba" are supplied as building kits. Due to their different shapes, from rounded to angular, they are suitable for different surface coverings such as mosaic or large-format tiles.
With a width of 800, 900 and 1000 mm, the benches can be combined with almost all shower base model variants from the Tub product group from Lux Elements. So that water can run off the seat when used in the shower area, the seat surface has a slight gradient.
The range is rounded off by two backrest design variants to suit all bench forms. Both the seat areas and the backrests can optionally be ordered with a factory-fitted heating mat.

In addition, the Lux Elements range contains a matching light rope for every model in the "Shape" and "Size" series. It is installed under the overhang of the front seat edge, where a corresponding recess has already been milled in the factory.

A further new model in the widths 800, 900 and 1000 mm is the floating bench "Float" for installation in a niche. It is supplied together with mounting

material and can also be equipped with seat heating.

Individual adaptation – for flexible use

As a flexible solution for large shower or wellness areas, there is a new bench form "Relax-Ba Cut" with a width of 1200 mm. There is a choice of a version with an angular basic shape and a variant with a rounded design. In both cases it is a building kit that allows two installation variants: the benches can be mounted with or without an overhang, e.g. for a light strip. These models can also be fitted with a heating mat in the factory.

The special advantage of the "Cut" is its flexibility: not only can the benches easily be shortened, they can also be combined with one another. They are thus also suitable for larger facilities where long bench seats are called for.

Further information can be found on the manufacturer's website and in the "Systems for bathroom and shower" product range in the "Bathroom design" section.
