Lux Elements Private Spa

Leverkusen, 01.05.2022

New spa showers for bathrooms and spa areas

Since the beginning of 2022, the Lux Elements product category "Systems for Private Spas" has included new configurable cabins with one or two bench seats for use as spa or steam showers.

The "Lux Elements®-Spa Cab" building kits with elements made of hard foam, glass and metal are suitable both for your own home and for equipping private spa areas in the public sector, e.g. in hotels. There is currently a choice of nine standard cabin models in the basic shapes pentagonal, square and rectangular. There is room inside for one or two people, depending on the size. For adaptation to the room situation, each model can be extended steplessly by up to 300 m in length and/or width. For the equipment there is a choice of various technical components, from lighting to seat heating and fittings for steam equipment. The accessories for the processing are also supplied by Lux Elements.

In order to make the configuration of the cabins easier for dealers and prospective customers, a calculator has been developed with which the desired components of an individual cabin can be compiled. This compilation is available afterwards in PDF format.

The calculator can be found on the landing page
